- *Theodore G Long*, MD, MHS, Division of Quality Measurement, Quality Measurement and Value-Based Incentives Group, Center for Clinical Standards and Quality, Center for Medicare and Medicaid Services

*Quality measures are tools that help measure or quantify healthcare processes, outcomes, patient perceptions, and organizational structure and/or systems that are associated with the ability to provide high-quality health care and/or that relate to one or more quality goals for health care. In response to an increasing demand for quality measures, the Centers for Medicare & Medicaid Services (CMS) developed a standardized system for developing and maintaining the quality measures used in its various accountability initiatives and programs. Known as the Measures Management System (MMS), measure developers (or contractors) are encouraged follow this core set of business processes and decision criteria when developing, implementing, and maintaining quality measures. Best practices for these processes are documented in the manual, A [Blueprint for the CMS Measures Management System \(the Blueprint\)](#).*

**10:30 am**      **Meeting Adjourns**
